Education

United Institute of Technology — Prayagraj, India
Bachelor of Technology in Computer Science and Engineering (CGPA: 6.8/10) — *Oct 2023 – Expected 2027*

- **Relevant Coursework:** Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems

Technical Skills

Languages: JavaScript (ES6+), Java, Python, SQL, HTML5, CSS3
Frontend Development: React.js, Tailwind CSS, Responsive Web Design, Context API, RESTful Integration
Backend & APIs: Node.js, Express.js, RESTful APIs, JWT Authentication, MVC Architecture
Databases & Tools: MySQL, Relational Database Schema, JDBC, Git, GitHub, VS Code, Postman, IntelliJ IDEA

Experience

Techpile Technology Pvt. Ltd. — Offline
Software Engineering Intern – Python & Web Systems — *May 2026 – Jul 2026*

- Engineered automated Python data processing scripts and workflow utilities, reducing manual data preparation time by 30%.
- Developed interactive performance-tracking modules and visual reporting dashboards for operational KPI tracking.
- Collaborated in an intensive technical program applying backend algorithms, modular architecture, and clean code principles.

IBM — Remote
Frontend Web Development Intern — *Jul 2025 – Aug 2025*

- Constructed responsive, reusable frontend interface components using modern JavaScript, HTML5, and CSS3 based on UI/UX mockups.
- Integrated asynchronous REST APIs and validated client-server pipelines using Postman to render real-time application data.
- Earned a performance stipend for delivering bug-free modules and structured technical documentation within scheduled sprints.

United Institute of Technology — Prayagraj, India
Software Development Trainee – Core Java — *Jul 2024 – Aug 2024*

- Implemented Object-Oriented Programming (OOP) architectures utilizing inheritance, polymorphism, encapsulation, collections, and custom exception handling.
- Designed modular console-based applications to practice algorithmic problem-solving and structured software maintainability.

Projects

E-Commerce Marketplace & Order Processing System | *React.js, Node.js, Express.js, MySQL, JWT* — 2026

- Architected a scalable full-stack web application featuring dynamic product catalogs, persistent shopping cart, and authenticated checkout flows.
- Engineered 12+ RESTful API endpoints with request validation, role-based JWT authorization, and automated invoice generation.
- Designed an indexed relational MySQL schema with transactional safety to prevent inventory concurrency errors and double-booking.

Student Quiz & Course Learning Portal | *React.js, Node.js, Express.js, MySQL, REST APIs* — 2026

- Developed an end-to-end e-learning platform supporting student authentication, dynamic course catalogs, and automated quiz scoring.
- Implemented 8+ secure REST APIs in Express.js with input validation, token-based authentication, and instant result calculation.
- Constructed an optimized React frontend with client-side state handling, guaranteeing sub-100ms UI transitions.

Enterprise Banking Management System | *Java, JDBC, MySQL, OOP Architecture* — 2025

- Built a desktop banking software following MVC patterns and OOP principles to manage secure customer accounts and ledger transactions.
- Integrated JDBC using PreparedStatements to sanitize inputs and eliminate SQL injection vulnerabilities.
- Enforced strict ACID transaction management with automated rollbacks to guarantee ledger consistency during failed transfers.

Certifications & Achievements

Techpile Technology: 45 Days Summer Training in Data Analytics (Credential ID: TechpileST260067) | Jul 2026
IBM: PBEL Virtual Internship Certification in Web Development & Cloud Systems | Aug 2025
United Institute of Technology: Summer Training Certification in Core Java | Aug 2024
Recognition: Awarded Performance Stipend during IBM PBEL Internship for timely milestone completion
